

# Longitudinal effects of self-care (and baseline quality of life) on caregiver burden and quality-of-life outcomes in patients with heart failure and their family caregivers

Robert Thomson

## TABLE OF CONTENTS

CHAPTER 1 .....	1
OVERVIEW OF THE THESIS.....	1
CHAPTER 2 .....	7
LITERATURE REVIEW.....	7
2.1 Introduction .....	7
2.2 Search strategy .....	7
2.2.1 Study selection.....	10
2.2.2 Study characteristics.....	10
2.3 Caregiver burden .....	11
2.3.1 Caregiver burden overview.....	11
2.4 Caregiver burden – review and analysis .....	21
2.4.1 Patients’ functional status .....	21
2.4.2 Patients’ comorbidities, symptom burden and disease severity .....	21
2.4.3 Patients’ and caregivers’ age.....	22
2.4.4 Self-care and caregiver contribution to self-care .....	22
2.5 Family caregiver support and self-care management .....	23
2.5.1 Family caregiver support and self-care management overview.....	23
2.6 Family caregiver support and self-care management – review and analysis.....	39
2.6.1 Definition of self-care .....	39
2.7 Barriers to effective self-care .....	40
2.7.1 Age.....	40
2.7.2 Comorbidities .....	41
2.7.3 Cognitive function .....	41
2.7.4 Depression.....	42

2.8 Facilitators of self-care .....	42
2.8.1 Caregiver social support .....	42
2.8.2 Heart Failure knowledge .....	43
2.9 Consequences of poor self-care.....	43
2.9.1 Medication and non-adherence .....	43
2.9.2 Poor quality of life .....	44
2.10 Health-related Quality of Life in Heart Failure Patients and Caregivers	44
2.10.1 Introduction .....	44
2.11 Health-related quality of life in HF patients and caregivers – review and analysis.....	60
2.11.1 Health-related quality of life definition .....	60
2.12 Predictors of patients’ health-related quality of life .....	60
2.12.1 Physical symptoms .....	60
2.12.2 NYHA classification.....	61
2.12.3 Mental health and anxiety .....	61
2.12.4 Social support .....	61
2.13 Predictors of caregivers’ health-related quality of life .....	62
2.13.1 Patients’ physical symptoms and comorbidities – impact on caregivers ...	62
2.13.2 Patient predictors of caregivers’ mental and emotional health .....	62
2.13.3 Caregivers’ predictors of health-related quality of life .....	63
2.14 Heart Failure Dyads.....	64
2.14.1 Introduction .....	64
2.15 HF Dyads – review and analysis .....	78
2.15.1 Supportive relationships and patient and caregiver self-care: correlations, associations .....	78
2.15.2 Self-care and caregiver burden: correlations, associations .....	78
2.15.3 Congruence/incongruence.....	79
2.16 Interdependence in patient–caregiver dyads.....	80
2.16.1 Self-care and quality-of-life outcomes in patient–caregiver dyads (APIM) .... .....	80
2.16.2 Depression and anxiety and quality-of-life outcomes (APIM) .....	81
2.16.3 Mutuality and self-care.....	81
CHAPTER 3 .....	85

METHODS .....	85
3.1 Introduction .....	85
3.1.1 Research questions .....	85
3.1.2 Design of study .....	86
3.1.3 Plan of study .....	86
3.1.4 Population, sample and selection process.....	88
3.1.5 Inclusion criteria .....	90
3.1.6 Exclusion criteria.....	90
3.2 Data Collection Procedure.....	91
3.2.1 Introduction .....	91
3.2.2 Ethics approval .....	92
3.2.3 Pre-testing of the questionnaires .....	93
3.2.4 Further ethical considerations and potential risks.....	93
3.2.4.1 <i>Risks and benefits</i> .....	93
3.2.4.2 <i>Confidentiality and anonymity</i> .....	94
3.2.4.3 <i>Management Issues</i> .....	95
3.3 Socio-demographic data.....	96
3.4 Clinical data .....	96
3.4.1 New York Heart Association (NYHA) classification .....	96
3.4.2 Ejection Fraction .....	97
3.4.3 Pharmacological management .....	98
3.5 Measures .....	99
3.5.1 Zarit Caregiver Burden Interview Scale .....	100
3.5.2 SF-12 Health Survey.....	100
3.5.3 Minnesota Living with Heart Failure Questionnaire (MLwHFQ).....	101
3.5.4 The Self-Care of Heart Failure Index (SCHFI).....	103
3.5.5 Caregiver Contribution to Self-care Heart Failure Index (CCSCHFI).....	103
3.6 Data Analysis.....	105
CHAPTER 4 .....	109
RESULTS.....	109
4.1 Introduction .....	109
4.2 Socio-demographics and clinical information .....	109

4.2.1 Background information .....	109
4.3 Patients' clinical data .....	111
4.4 Time-point One: Patient and Family Caregiver Self-care scores .....	112
4.4.1 Introduction .....	112
4.4.2 Differences between patients' and family caregivers' contribution to self-care at time-point one. ....	114
4.5 Time-point Two: Patient and Family Caregiver scores .....	115
4.5.1 Introduction .....	115
4.5.2 Differences between patients' and family caregivers' contribution to self-care at time-point two.....	118
4.6 Time-point One: Patient and Family Caregiver Quality of Life (SF-12) .	118
4.6.1 Introduction .....	118
4.6.2 Differences between patients' and family caregivers' SF-12 PCS at time-point one .....	118
4.6.3 Patients' and family caregivers' SF-12 MCS at time-point one.....	120
4.6.4 Differences between patients' and family caregivers' SF-12-MCS at time-point one .....	121
4.7 Time-point Two: Patient and Family Caregiver Quality of Life (SF-12) .	121
4.7.1 Introduction .....	121
4.7.2 Differences between patients' and family caregivers' SF-12-PCS at time-point two.....	121
4.7.3 Patients' and family caregivers' SF-12 MCS at time-point two .....	121
4.7.4 Differences between patients and family caregivers SF-12-MCS at time-point two .....	122
4.8 Time-point One: Patient and Family Caregiver Quality of Life (MLwHFQ) .....	122
4.8.1 Introduction .....	122
4.8.2 Differences between patients' and family caregivers' MLwHFQ total score at time-point one .....	122
4.9 Time-point Two: Patient and Family Caregiver Quality of Life (MLwHFQ total).....	122
4.9.1 Introduction .....	122

4.9.2 Differences between patients and family caregivers' MLwHFQ total score at time-point two.....	123
4.10 Time-point One: Patient and Family Caregiver Quality of Life (MLwHFQ PCS) .....	123
4.10.1 Differences between patients' and family caregivers' MLwHFQ PCS at time-point one .....	123
4.11 Time-point Two: Patient and Family Caregiver Quality of Life (MLwHFQ PCS) .....	123
4.11.1 Introduction .....	123
4.11.2 Differences between patients' and family caregivers' MLwHFQ PCS at time-point two.....	124
4.12 Time-point One: Patient and Family Caregiver Quality of Life (MLwHFQ ECS) .....	124
4.12.1 Introduction .....	124
4.12.2 Differences between patients and family caregivers' MLwHFQ ECS at time-point one .....	124
4.13 Time-point Two: Patient and Family Caregiver Quality of Life (MLwHFQ ECS) .....	124
4.13.1 Introduction .....	124
4.13.2 Differences between patients' and family caregivers' MLwHFQ ECS at time-point two.....	125
CHAPTER 5 .....	127
RESULTS.....	127
5.1 Introduction .....	127
5.2 Time-point One: Family Caregiver Burden (ZBI Scale) .....	127
5.2.1 Introduction .....	127
5.3 Time-point Two: Family Caregiver Burden (ZBI Scale) .....	128
5.3.1 Introduction .....	128
5.3.2 Changes in caregiver burden scores (ZBI Scale) from time-point one to time-point two.....	129
5.4 Caregiver Burden and Patient and Family Caregiver Baseline Factors that Predict Caregiver Burden (Outcome) .....	129

5.4.1 Statistical analysis.....	129
5.5 Model 1: Multiple linear regression of patients' time-point one variables	133
5.6 Model 2: Multiple linear regression of family caregivers' Time-point One variables .....	136
5.7 Model 3: Multiple linear regression of patients' and family caregivers' time-point one variables that predict caregiver burden at time-point two .....	137
CHAPTER 6 .....	139
RESULTS.....	139
SELF CARE AS PREDICTORS OF QUALITY-OF-LIFE OUTCOMES IN DYADIC RELATIONSHIPS.....	139
6.1 INTRODUCTION .....	139
6.2 Effects of self-care (management, maintenance and confidence on physical health (SF-12) outcomes .....	142
6.2.1 Physical health (PCS, SF-12) .....	142
6.3 Effects of self-care (management, maintenance and confidence on mental health (SF-12) outcomes .....	142
6.3.1 Mental Health (SF-12 MCS).....	142
6.4 Effects of self-care (management, maintenance and confidence on health-related quality-of-life outcomes.....	145
6.4.1 MLwHFQ total score .....	145
6.5 Effects of self-care (management, maintenance and confidence on physical health (PCS) outcomes (MLwHFQ).....	146
6.5.1 Physical Health MLwHFQ.....	146
6.6 Effects of self-care (management, maintenance and confidence on emotional health (ECS) outcomes (MLwHFQ) .....	149
6.6.1 Emotional Health (MLwHFQ).....	149
6.7 Effects of baseline physical and mental health on quality of life of the dyad at time-point two .....	150
6.7.1 Baseline physical health (SF-12 PCS).....	150
6.7.2 Baseline mental health (SF-12 MCS) .....	151

6.8 Effects of baseline MLwHFQ total score, physical and emotional health on quality of life of the dyad at time-point two .....	151
6.8.1 Baseline MLwHFQ total score .....	151
6.8.2 Baseline physical component score (MLwHFQ PCS).....	152
6.8.3 Baseline mental health: emotional component score (MLwHFQ ECS) .....	153
CHAPTER 7 .....	163
DISCUSSION .....	163
7.1 Introduction .....	163
7.2 The study sample .....	163
7.2.1 Sociodemographic characteristics .....	163
7.2.2 Clinical characteristics .....	164
7.3 Differences between patients' and family caregivers' self-care and quality of life at TP1 and TP2 .....	166
7.3.1 Differences between patients' self-care and caregivers' contribution to self-care at TP1 and TP2.....	166
7.3.2 Differences between patients' and caregivers' quality of life (SF-12) at TP1 and TP2 .....	170
7.3.3 Differences between patients' and caregivers' quality of life (MLwHFQ) at TP1 and TP2 .....	171
7.4 Patient and family caregiver characteristics, self-care and quality of life at TP1 that are associated with caregiver burden at TP2.....	174
7.4.1 Changes in caregiver burden from TP1 to TP2 .....	174
7.4.2 Correlations and regression models .....	175
7.5 Self-care as predictors of quality of life (outcomes) in patient–caregiver dyads .....	176
7.5.1 Patients' actor effects: self-care on quality-of-life outcomes (SF-12 and MLwHFQ).....	177
7.5.2 Caregivers' actor effects: self-care on quality-of-life outcomes (SF-12 and MLwHFQ).....	178
7.5.3 Patients' partner effects: self-care on quality-of-life outcomes (SF-12 and MLwHFQ).....	179
7.5.4 Caregivers' partner effects: self-care on quality-of-life outcomes (SF-12 and MLwHFQ).....	180

7.5.5 The actor and partner effects of baseline quality of life on quality of life at TP2 .....	181
7.6 Strengths of the study.....	182
7.7 Study limitations .....	183
7.8 Conclusions .....	185
7.9 Implications for practice and future research.....	189
